Experience

Webiseny

Oct. 2022 - Jun. 2024

Web Developer & Designer

Barcelona

- Developed lots of websites from scratch using LAMP with Wordpress as CMS.
- Design was sometimes in house, I learnt a lot; javascript libraries like lenis.js, pdf-lib themes like undescores (_s), woocommerce, php plugin editing, Custom post types, ACF.
- Did lots of Data formatting in xlsx, csv, product bulk for prestashop/woocommerce .
- Did maintenance and troubleshooting in big stores (+250K Users) with unit testing.
- Photoshop bulk images for products as well as custom icons for stores/sites.

Freelancing

Jan. 2017 – Jan. 2022

Web Developer & Designer

Barcelona

- Did freelancing work to more than 10 small business, including Samok, Forn Armengol, La Casa de Asterión, Decosol Suministros, MySports and others.
- Managed domains DNS and it's record (A, WWW, CNAME etc), did multiple revision according to client's requirements, made them with HTML/CSS/JS/PHP/MYSQL, Icons with Illustrator/Photoshop, design with Adobe Xd. Also did lots of helpdesk and documented everything in case they wanted to change images etc.
- Used multiple apis from Rapid Api for MySports and implemented backend + frontend using modern technologies.

LOYIC

Jul. 2020 – Jan. 2021

ABAP Developer

Sabadell

- Acquired expertise in ABAP and SAP by using company documentation and other resources online.
- Collaborated with other employees with junior projects.
- Documented my entire journey for future interests.

Notable Projects

Velosuite

- Multi-purpose website with a variety of tools, from managing your garage, backups, finances, etc. MERN Stack, Google Cloud APIs, HERE api traffic data, crons, PWA, Adobe Photoshop, Illustrator, Email Verification & password reset. SSL from Let's encrypt and certbot.

Reflow

- Fullstack Web on a platform using NodeJs about interior design using the library blueprintjs. Tools used: HTML, CSS, JS, JQuery, EJS Framework, AJAX, NodeJS & MySql in backend with Logo Design Counts with automated 3D Models from Blender, Python and ThreeJS.

Reddit Clone

- Made with NodeJS, express, router, JWT, MongoDB, fetch JS with lots of functionalities from the official site. Includes email verification and reset.

Education

Jaume Viladoms

CFGS Computer Science - Web Development

- Global grade of 8.3

Sep. 2021 - 2023

Sabadell, ES

Jaume Viladoms

CFGM Computer Science - Systems and Networking

- Global grade of 8.4

Sep. 2019 - 2021

Sabadell, ES

Certificates

Microsoft Word

Microsoft Excel

Microsoft Server 2019

Cisco IT Essentials

Oracle PLSQL

Oracle Java

Linux Essentials LPI

Leadership & Activities

- **Skills** Open source enthusiast, made pulls requests for big projects such as dopamine-windows, Good on critical thinking, teamwork, good documentation and problem solving, experience with helpdesk (anydesk /w), code optimization and maintenance of computer hardware, knowledge in both 3D, 2D and Video (such as Sony Vegas) and my main tech skills being HTML, CSS, JS, PHP, JQUERY, MJML, MySQL, Python (pandas, blender-cli), chartjs, blueprintjs, express, NodeJS, Unit testing (Jest), MongoDB, PostMan, API REST, Wordpress, EJS, PWA, React, react router, editor.js, image-scraper, Illustrator, Photoshop, Figma, Adobe Xd. Favourite tech stacks being MERN and LAMP with MVC Architecture.
- **Interests** Programming challenges, Cars, 3D Modeling, Videogames modding, GYM.
- **Languages** Native Catalan & Spanish, Professional English Speaking & reading.
